- Research

YOGESH SAHU

Projects

Quiz App

A desktop quiz app developed Using JAVA for beginners which is helpful for beginners to learn new things

- It helps me to understand OOPs concepts and MySQL database
- It also helps to gain some experience of Java Swing and AWT

Clones of Popular Websites

Understanding web development technologies such as HTML, CSS, and Java-script is aided by redesigning clones of well-known websites like Netflix and Amazon.

- Showcased ability to recreate complex web layouts and features using modern web technologies. Demonstrated understanding of responsive design, accessibility, and performance optimization techniques.

Portfolio Webiste

- Built a modular single-page application with React.js and reusable components (Navbar, Footer, About, Projects, Contact).
- Implemented responsive UI/UX design optimized for mobile, tablet, and desktop devices.
- Added smooth animations and transitions using CSS3 and Framer Motion for enhanced interactivity.
- Integrated links to live project previews, GitHub repositories, and resume download for recruiters. Deployed on GitHub Pages with custom configuration for seamless hosting.
